For our Corporate Social Responsibility is the continuing commitment by business to behave ethically and contribute to economic development while improving the quality of life of the workforce and that of the local community and society at large.

Swatchh Doors

Doors are an integral aspect of the modern interior. They have to conform to the most stringent quality norms and heightened aesthetic sensibilities. Swatchh Doors are made from high quality timber with high resistance, these doors are extremely durable as also termite and borer proof.

Our Doors USP

- ✓ Termite and Borer resistant
- ✓ Light Weighted*
- ✓ Impact resistant
- ✓ Climate stable
- ✓ Robust & long life products

Swatchh laminated doors are modern, elegant and ready to use that can be easily installed with minimum efforts to protect and beautify your dream home. They are made out of high quality wood to make them exceptionally durable and dimensionally stable with excellent tooling and finishing properties.

The cross bands veneers are uniformly dried to the requisite moisture content. They are then bonded with special quality Phenol formaldehyde synthetic resin as per the guidelines of IS:2202. Swatchh Flush Doors are total termite and borer proof.

The laminated doors are manufactured under strict quality control conditions that exceed the ISI specifications. The doors can be manufactured according to customized sizes too.

Swatchh Veneer Doors

To achieve the best balance of stunning natural wood appearance and strong, durable performance, the best solution for doors is to use a strong and stable core that is then veneered.

Swatchh Veneer Doors are made from imported timber of high resistance and quality, these doors are extremely durable as also termite and borer proof.

- ❑ Environmentally friendly wooden doors.
- ❑ Increased stability of doors.
- ❑ More cost effective timber doors.
- ❑ Flexibility indoor designs.
- ❑ Consistency of material with timber doors.

Swatchh Fire Doors

Swatchh Fireproof Doors have fire resistant levels from 30 minutes up to 2 hours. Providing enough time for a safe escape. These door sets have options of glazing, fire resistant, self-closing louvers, single and double door sets for emergency exit.

Our Fire Rated Doors for up to 02 hrs. fire rating.

- Hardware can be selected as per requirement such as Panic Bar, door closers, handles etc.
- Can be Single/Double leaf door.
- Prevents fire to spread.
- Customized as per requirement.
- IPRTI Approved Fire Doors.

These products are manufactured under supervision of qualified technocrats with advance, well equipped and modern machines, skilled professional continuously work for quality up gradation.

The door frames are manufactured from well seasoned wood with a moisture content between 16% to 18% (+,-2%) from selected imported wood as per your speciation and requirement.

F 2 F Wooden Solutions

The purpose of the fixing is to enable connection between the pressed wood door frame and the wall. The type of fixing selected will depend on the type of your wall, how you intend to finish the junction between the wall and the frame and the way in which you would prefer to install the frame into or onto the wall.

Swatchh Ply

When it comes to plywood, Swatchh is by-far, the undisputed leader with innovative products designed around you, the global Indian. The signature plywood products are used extensively in commercial and domestic settings. Swatchh plywood is affordable yet durable and offer unmatched strength and oodles of style to complement modern, urban living. USP

- ❖ Warp resistant plywood which maintains its original shape over the years.
- ❖ More number of plies for added strength.
- ❖ Unique formula makes every ply borer, termite proof, calibrated and long lasting.

Swatchh Block Boards

Swatchh block board is a compound wood board made of uniform strips of wood, placed end to end in adjacent columns. They are then sandwiched between two thick veneers of hardwood (usually) and finally glued under a tremendous amount of heat and pressure. Several types of tests are conducted on the samples of finished block boards to test their quality.
